

REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 21

THE REDCLIFF REVIEW THURSDAY, JULY 7th, 1932

Number 37

Results of Midsummer Exams, at the School

The following is the list of pupils who were successful in passing the midsummer examinations:

Grade I to Grade II
Kenneth Simpson, Norman Giam, Cecil Sangster, Cyril Woria, Gordon Sheasby, Betty Balmer, Edna Martin, Mary Sween, Roy Newnam, Rignor Jorgensen, Stanley Lowrie, Muriel Hitehen, Leopold Bulanda, Horace Obeor, Dorothy Britt, Bertha Schneider, George Hope, George Skidmore, Dorothy Walton, Donald Home, Jeanie Stratton, Roseoline Prusky.

Grade III to Grade IV
Winnie Bamforth, Alan Barby, Joe Bestien, Joe Boucker, Kate Evans, Evelyn Fulton, Violet Hope, Anna Jorgensen, Evelyn Kaldstad, Stanley Lemming, Alice McLachlan, Walter Niduk.

Grade V to Grade VI
Zelda Bamforth, Edna Baatien, Fred Bladen, Eddie Bohnet, Dolores Buchholz, Rosalie Brucher, James Cahn, Ellen Cook, Lynn Ellis, Marjorie Fairhurst, Evelyn Fitzhugh, Kathleen Fulton, Ruth Giam, Victor Giam, Betty Gordon, Ralph Hargrave, Hilda Humphrey, Arnold Hurlbert, Agne Knudsen, John Lemming, Kaja Madsen, Marjorie McLachlan, Harold Moseloh, Kathleen Myers, Norman Rindahl, Carol Schellhorn, Roberta Shaw, Harold Sween.

Grade VII to Grade VIII
Robert Allenbach, Svend Anderson, John Balmer, Jack Brydie, Annie Buelch, George Hallantyne, Ernest Robert Todolch, Bell, Alice Buchholz, John Garrecht, Michael Garrecht, Edward Harris, Ellen Hope, Florence Johnson, Sylvia Kaldstad, Sanford Kaldstad, Jack Leamonth, Albert Lien, Gene Maillard, Janet McFadden, Gordon Newnam, David Patterson, Albert Schaeffer, Annie Schmidt, Aswald Sween, Dolly Wells.

Grade six prize winners for the year—Perfect attendance:
Annie Schmidt, Alice Buchholz, Svend Anderson, Jack Leamonth, Sanford Kaldstad, John Balmer, John Garrecht, Michael Garrecht, Gene Maillard, Best Art book, Jack Brydie. Greatest improvement in writing, Alice Buchholz. Neatest set of exercise books, Annie Schmidt. Highest standing for the year, Annie Schmidt.

From Grade VII to VIII
Florence Curtis Buchholz, James Dutton, Robert Fulton, Elizabeth Klemm, Lily Knudsen, Douglas Lemming, Susan Skidmore, Margaret Stratton, Jessie Stratton, Margaret Stratton, Ned Van Wert.

From Grade 8 to High School
Elsie Bladen, 75; Phyllis Sheldon, 69; Leslie Lepard, 68; Lester Marshall, 65; Elmer Leamonth, 61; June MacFadden, 59; Graham Ellis, 59; Mary Furth, 58; Yelma J. Trembath, 57; Mary Schaeffer, 56; Frank Goodline, 55; Eddie Schmidt, 52.

High School Results
Non-departmental Exam Units
Phyllis Sheldon, 82; Robert Pow, 85; Reggie Rose, 83; Robert Buchholz, 80; Jim Brown, 78; Mildred Walton, 76; Richard Rose, 74; Lillian Lemming, 75; Elmer Congdon, 74; Florence Jacobson, 73; Beth Palle, 72; Emma Podesta, 72; Leonard Larson, 69; Edith Collard, 68; Congram, 68; Sarah Davies, 66; Blodwin Evans, 65; Ruth Pow,

Diamonds Win First In July Schedule

Defeat Callies Two to One in The Five Roses Cup

The first game of the July schedule in the local soccer league was won by the Diamond D Tuesday evening when they took the Callies into camp to the tune of Two goals to one.

The Diamonds had a few changes in their line up which greatly improved the forward section. From the start they showed up well and they had a slight edge of the play for the first period. The game was not in progress when T. Davies took a nice pass from Houston and scored from close in. Although no more goals were scored in this period the play continued else and exciting to the finish.

The second period was just nicely under way when Middleton took possession for the Callies and made a nice run down the wing. When well in shot across to Martin who made a clean drive which gave Klemm no chance to save.

With the score now tied both teams worked hard to break it and just as the fans had made up their minds the game would end that way Houston got possession and, after some quick work in front of the net, drove in a handy for two points. The final whistle blew a few minutes later.

Brick and Coal Co. Is Re-Organized

Mrs. M. T. Gunderson and two sons, of Minneapolis, who are the largest stockholders, in the Brick & Coal plant here, were in town last week on business in connection with the plant while here they completed arrangements for the re-organization of the company and plans were made for starting the plant in operation again as soon as conditions throughout the country would warrant.

62; Jean Peterson, 62; Grace Maskell, 61; Annie Shaw, 60; Marg. Rutherford, 59; Marg. Johnson, 56; Jim Lowens, 53; Helen Rose, 52.

Failed in One Unit Only
Ted Miskell (Literature)
Albert Podesta (Composition)
Keith Ellis (History)
Sam Fulton (French)
Myrtle Skidmore (French)
John Soukup (Composition)
Louise Smith (Geometry)
Mack Martin (Composition)

Failed in Two Units
Mary Broughton (algebra & geometry), Eddie Champ (composition and history), Ray. Du-beau (composition & history).

Failed in Three Units
Fern Miskell (Literature)
History (Literature), Janet Patterson (composition, french, literature), George Kitchen (composition, history, algebra).

Highest average in first year: Robert Pow, 85.

Highest average in second year: R. Buchholz, 80.

Highest average of third year: P. Sanderson, 90.

Redcliff Annual Stampede Was A Great Success

Good Crowd in Attendance—Exciting Horse Races and Thrilling Bucking Contests are Feature of the Day

With ideal weather, a good crowd, fast horses, good bucking bronchos, wild stunts, plenty of riders and a continuous program, all as background to Redcliff's Annual Stampede was put over with a bang on Dominion Day.

The program started off with a long list of events for school children and as all ages were given a chance to compete each event drew a long list of entries much to the enjoyment of both contestants and spectators. A feature which appealed to the younger kiddies was that all who entered got an ice cream cone.

The first heat of the Roman standing race made a thrilling opening event for the horse races, and the expert horseman played by Mrs. Joe Tester in this difficult race, moved the crowd to awe and interest. There were three entries. In the first heat, Mrs. Tester, Joe Wells and R. Page, but as Page bolted and left the track in the first round he withdrew his entry. Mrs. Tester won both heats and first money and Joe Wells second.

Among the exciting finishes to the day was the boys' half mile horse race when Graham Ellis made a poor start but soon got into the running and came down the home stretch nose to neck with the pole horse and gaining every step to go under the wire for a dead heat. The boys decided to split the first and second money.

The half mile open was also a nice one. Mrs. Page won the first heat, R. Page second and Shafer third with all three well bunched. In the second heat Mrs. Page's mount bolted just coming into the stretch, moving Miss Schaeffer up to second place for the heat, but in the third Mr. and Mrs. Page reversed positions, first and second going to them in that order and Ellis third to Miss Schaeffer.

Although the relay race was not so closely contested as in previous years, the dexterity with which the riders changed their mounts proved most interesting and exciting for the spectators.

With the exception of one, the horses supplied for the bucking contests did their act in red stampede style and kept the thirteen riders guessing as to what they were going to do next. All the riders made a splendid showing and the prizes to Sykes-Robinson, Jenner; Art Williamson, Box Springs and Cecil Bedford, Telma in that order. Robinson was greatly with the bronze trophy made by T. Todd of Redcliff and which went with the first prize.

During the afternoon, between events, Wilfrid Campeau and Neil Rutherford furnished no end of amusement with their outfit which consisted of a buck board and charger which could have come through the forest and a trick pony. Their antics

were very amusing and added much to the success of the day. On the whole the day was a pronounced success and the officials were complemented on all sides for the splendid manner in which the program was carried out.

The big dance in the evening was well attended and most successfully conducted.

The following were the prize winners:

Horse Races
Roman Race—Mrs. J. Tester; Joe Wells.
Boys 15 and under—Graham Ellis and J. Lapp tied for first and second money.

Six furlongs—R. Page, G. Ellis, J. Schaeffer.
Half mile—R. Page, Mrs. R. Page, Edna Schaeffer.

One mile—R. Page, G. Ellis, J. Sewell.

Ladies' race—Mrs. R. Page, Nellie Schilmar.

Pony race—14½ hands and under—G. Ellis, R. Page.

Relay race, 1½ miles, three horses—R. Page, Joe Wells and J. Tester.

Novelty race—Basil Lawrence, Joe Tester.

Consolation race—M. Schaeffer, Ruby Ferns.

Bucking contest—Sykes Robinson, Jenner, 88½ points; Art Williamson, Box Springs, 86 2-3; Cecil Bedford, Maple Creek, 82 1-3 points.

U. F. A. LEADERS MAKE PLANS FOR FUTURE

Headed by Robert Gardiner, members of the U. F. A. executive met with U. F. A. members of both the legislature and the federal parliament, in Edmonton last week for the purpose of discussing plans for the future.

At the close of the meeting a manifesto was issued which suggests a Dominion wide co-operative plan whereby all may join the farmers party who desire. It also provides for nationalization of financial systems, abandonment of the gold standard, "a well considered policy of inflation," public ownership of public utilities, a more equitable distribution of wealth and other such suggestions, as the U. F. A. has been advocating in the past.

The rains this week greatly improved crop conditions.

Mr. F. Pow, of Strathmore, arrived in town Monday to spend his holidays with his parents, Rev. and Mrs. R. E. Pow.

Mr. and Mrs. N. Edvardson, of Estevan, who are motoring to Calgary, stopped over here for a few days this week to visit Mr. and Mrs. T. Dutton.

St. Ambrose Church junior W. A. will hold a sale of work and tea cream social Monday next, July 11th, on the vicarage lawn at 3 p. m.

Swimming Pool is Now Flooded

How Long It Will Remain Open Depends on Public

This work was commenced in getting the local swimming pool in shape to open up, and much good progress has been made that the water was turned on yesterday and the pool is now ready to use.

It will all depend on what response is made to the selling of season tickets, just how long the pool can be kept going. The ticket will be on sale next week. Be sure to get one if you want the pool kept going.

Big Farmers Meeting Here on July 18th

Norman Priestley and John Fowle Will be Present

Arrangements have been made to hold a meeting in Redcliff on Monday, July 18th, commencing at 7:30 p. m., for the purpose of discussing matters of interest, especially to farmers of the district.

The meeting will be held in Cliff Hall and will be addressed by Norman Priestley, vice president of the U. F. A., his subject will be: "Co-operative Activities." John Fowle, U. F. A. director, will also speak on general issues of the day.

Farmers of the district and others interested are urged to be present.

Robbers entered the home of Thos. Graham, Medicine Hat, last Monday night and stole about \$2,500 worth of jewelry and \$40 in cash. The culprits have not yet been caught.

Voting for the 60 delegates to represent the Alberta Wheat Pool is now taking place. About 39 have been elected by acclamation and among them is John Fowle, of Blindfold, who represents this district.

Legion and Bricks Play Draw Game

Score One All In The Five Roses Cup

The games in the local soccer league are becoming quite common this season. The fourth one for the June schedule was record last Monday evening when the Brick & Coal and the Legion played a 1-1 draw in the postponed Five Roses series.

For a time it looked as though the home team was going to have some difficulty fielding a team as some of the players failed to put in an appearance at the last minute. However, the spares were called into action and after some delay the line-up was completed.

The changes in their players put the Bricks considerably at sea for the first ten minutes but after that they got well organized and were going so strong for the balance of the period that they had the visitors well in hand and making them show signs of fatigue. After 24 minutes play Charles headed

in a handy on a nice pass from Patterson. This lead gave the Bricks the necessary encouragement and for the balance of the period they had considerably the best of the play and they did most of the forcing. However there was no more scoring done before the whistle blew.

Refreshed by their rest the Legion started out strong in the second period and had a series of bombardments on the home goal but their shots were nearly all high wide or short and those that were not were nicely attended to by Hope, who made some fine saves. So wild was their shooting that on one occasion the Bricks made another strenuous effort to gain the lead, but it was too late. The game ended in a draw.

The following is the standing of the teams at the end of the June schedule:

| Team | League | Points |
|------------------------|--------|--------|
| Brick & Coal | | 4 |
| Callies | | 4 |
| Diamond D | | 2 |
| Legion | | 2 |
| Rank Five Roses Points | | |
| Brick & Coal | | 4 |
| Callies | | 3 |
| Legion | | 3 |
| Diamond D | | 2 |

The Misses Cecil and Irene Mignault, of Tompkins, are in town this week visiting their brother, Tom.

Mrs. Sellhorn entertained the Gordon Memorial Mission Band last Tuesday afternoon as a farewell before departing for the summer holidays. Games were played on the church grounds after which refreshments were served in the school room. All thoroughly enjoyed the afternoon.

Statesmen Needed

Dr. Swanson Believes England Will Lead the World Back to Sanity

Strong conviction that England will lead the world back to sanity and freedom was expressed at Prince Albert by Dr. W. W. Swanson, professor of economics, University of Saskatchewan, in a paper read at the annual convention of the Retail Merchants' Association.

The speaker said he had no doubt the Empire possessed statesmen with the quality of leadership to give the world the impetus toward better times.

He believes the day for self-adjustment is past, and that the people should be given a constructive program to help them adjust things. "What we require in this province and in the Dominion is constructive leadership from men in positions of responsibility," said Dr. Swanson.

"The people," he declared, "have a right to expect leadership from those in power in all places of responsibility. We can't wait, either, for we must restore the confidence of the people."

The speaker warned against the type of philosophy emanating from Russia.

Saskatchewan Coal

Record Production Of Lignite Induced Fuel For The Year

Taking the figures for the first four months of 1932 as an indicator, there will be a record production of lignite coal in the Province of Saskatchewan this year. The output from January 1 to April 30, 1932, was 329,290 tons compared with 258,000 tons for the corresponding period of 1931, an increase this year in the period under review of 101,149 tons.

The lignite coal-bearing areas of Saskatchewan lie principally in the southern part and are being mined in the vicinity of Regina, where there are about 125 miles southeast of Regina. This area contains possibly 4,000 square miles within which there is a probable reserve of over 57,000,000 tons of lignite in this area. The actual or definitely known reserve based on an estimation of actual thickness and extent over an area of more than 300 square miles is 3,412,000,000 tons.

Canada's Navy

Fourth Sea Lord Of The Admiralty Has Praise For Efficiency

Canada's naval establishment, at Esquimaux, on Vancouver Island, is highly efficient and a credit to the Dominion, said Rear-Admiral Geoffrey Brooke, recently appointed fourth sea lord of the admiralty and former commander of New Zealand's naval forces. Admiral Brooke was in Montreal, in the course of a trip from New Zealand. He takes up his new duties in London this afternoon.

The royal Canadian navy's new destroyer, the "Skeena," Admiral Brooke called as "one of the best vessels of its class on the sea."

Our Week Day Life

Has Much To Do With Building Of Character

The week-day side of our life has a great deal more to do with our spiritual life, with the building of our character, with our growth in grace, than many of us think. Some people seem to imagine that there is no moral or spiritual quality whatever in life's common task-work. On the other hand, no day can be made beautiful whose secular side is not as full and complete as its religious side.

Largest Mural Painting

Which is said to be the largest mural painting in the world has just been completed by two artists for Massachusetts Institute of Technology. It covers an area of more than 8,000 square feet.

"Why aren't you all school?" "Yesterday I finished my task and the master sent me home thinking I was in—Homer, Madrid."

Among the 2,715 aliens who were refused admission into Great Britain last year were four who arrived by air.

Operated on the same principle as a vacuum cleaner is a kind of galvanic iron, invented by a French engineer is filled by suction.

Apparatus has been invented in Germany to dial the 50 most used numbers on an automatic telephone as buttons are pressed.

Reports of shies from Casco-Bowdoin last year showed an increase of 4,960,000, or nearly 50 per cent. over 1930.

England makes use of about 140,000,000 stamps every week.

Say Men Are Vain

Prominent Chicago Men Freely Praise the Beauty of Women

"Another cat is out of the bag," the men of Chicago are proudly confessing in the hair-dressing department of beauty parlors.

"This information slipped out when several persons, including the owner of one of Chicago's swankiest beauty shops and an official in the Illinois Hair Dressers' Association, sat around a table discussing shop."

"One would be surprised at the number of judges and well known men in town who have eyed hair," said the beauty shop owner. "These were the reasons given for the hair styling and restoring jobs, and younger wives to be able, a desire to remain in the swim of things—and vanity."

Train Has Slowed Down

Speed Of Scottish Express Greater In Queen Victoria's Day

It is somewhat of a paradox that in this age of speed, when the drivers of motor-cars, motor-buses and aeroplanes are ever establishing fresh records, the railways should seek to be praised for accelerating their Scottish express by half an hour.

For on the railways, speed is a relative matter since the War, and fathers can tell their wondering children of the faster train of thirty or forty years ago. The "Flying Scotsman" ran to Edinburgh recently in 7 hours 50 minutes, but the Scottish express of Queen Victoria's later years reached Edinburgh in 6 hours 18 minutes.—London Spectator.

In Defense Of The Young

Mother Sheep Drives Off Coyote That Attacks Her Lamb

A report of a ewe attacking a coyote in defence of its young has been received by the British Columbia Department of Agriculture, from Salmon Arm.

Red Waby, Jr., a rancher, followed his mother, the Coyote, recently with a rifle, hoping to bag a coyote that had been raiding his flock. A short distance from the farm house the coyote appeared, and seized a lamb. The mother sheep turned on the attacker and forced him to retreat. At this juncture Waby brought his rifle into play and killed the beast.

"In the district say it is the first time they have heard of a ewe attacking a coyote."

Interesting Experiment

Cat's Nervous Is Used To Pick Up Impulses Transmitted by Nerves

An impulse transmitted by nerves in the body was described before the American Neurological Association by Dr. J. C. Brown and Walter Huggins. They described how they bored a hole in the skull of a cat and inserted an electrode in the auditory nerve. An impulse originated by sound before the message of the sound reached the brain.

They then whispered "hello" into the ear of the unconscious cat, and the cat responded by saying "hello" to the sound "hello" was accurately reproduced.

Heavy Gold Shipments

Costs \$4,000 To Ship Millions In Gold Across Atlantic

Recent gold shipments from America to Europe have resulted in throwing about \$1,000,000 of freight revenue in the past two months to the principal trans-Atlantic steamship lines.

Shipments of gold are expected to continue to Europe for a while longer, but bankers predict that the movement should soon begin to dwindle. Since April \$400,000,000 of the metal was taken back.

It costs roughly \$4,000 to ship \$1,000,000 of gold from New York to Europe.

Among the 2,715 aliens who were refused admission into Great Britain last year were four who arrived by air.

Operated on the same principle as a vacuum cleaner is a kind of galvanic iron, invented by a French engineer is filled by suction.

Apparatus has been invented in Germany to dial the 50 most used numbers on an automatic telephone as buttons are pressed.

Reports of shies from Casco-Bowdoin last year showed an increase of 4,960,000, or nearly 50 per cent. over 1930.

England makes use of about 140,000,000 stamps every week.

Secret and Confidential

Six British Women Keep Grave Secrets Of State

Six women who arrive at Buckingham Palace at 8 a.m. every weekday, know more of the secrets of politics and diplomacy than any other women in Britain.

They never talk about their secrets, not even to each other. They are the secretaries to the king's advisers, and high officials of the court.

They type documents that begin with such words as: "Secret and confidential: For cabinet use only."

"Personal and private: For the use of the Prime Minister only." But they don't talk about them. They forget them as soon as they have written them.

The business of the day begins soon after 9 a.m., when a bell summons them from their little office, cheerful with white paint and red carpets, to the presence of the King's Wigmans.

The king's private secretary, seven or eight, often sits there too. They are the secretaries to the king's advisers, and high officials of the court.

They travel with the king when he goes to Windsor, or Sandringham, or Balmoral. There they find time to relax among beautiful surroundings.

Their names are secret. In fact, few know who these mysterious women are.

This year, in the honors list, one of their names appeared, an O.B.E. (Order of the British Empire), with the simple explanation, "for services," but only rarely does recognition like this come their way.

All of them are unmarried, one or two saw service with the women's organizations, others have family links with the court. One quality they all possess in the supreme degree: tact.

Geological Mapping

Large Area In Southern Saskatchewan To Be Studied

Further geological mapping of the southwestern Saskatchewan will be undertaken this year by the Federal Geological Survey Branch, according to an announcement, said J. Wickenden will continue this work. He will investigate the underground water supply on an area extending from near the Manitoba boundary on the east to the Cypress Hills on the west, and north to Saskatchewan. A study of the records of deep wells will be made and special attention will be given to locating deposits suitable for use in the clay-working industry.

Cultivating Slimness

Women of Turkey have finally taken up their western sisters' idea of reducing. Plumpness is no longer a feminine attraction there, and the campaign to retain "that girlish figure" and to reduce the waist line is growing. Dancing, tennis and walking are very popular, and some leading ladies who spent their days railing at plumpers are taking brisk walks along the streets of Istanbul.

Gold From Sunken Ship

Master Locksmith Is Engaged To Open Caskets Containing Treasure

A master locksmith embarked for Europe recently on an adventure that may take him to the bottom of the sea to retrieve treasures buried beneath the waves since the ship containing the treasure was wrecked.

The treasure consists of 200,000 gold—200,000 in gold—there was added the price of mystery that brought an added thrill.

For when Charles Courtney, the master locksmith and president of the American Master Locksmiths' Association, sailed he did not know at what part in Europe he would land. The salvaging concern which engaged him gave instructions that he was to have his passport visated to permit him to land in England, France, or Germany. He was told an agent would meet him at Southampton, Charingcross or Bremen to give him further orders.

The secrecy even extended to the name and location of the sunken ship. All Courtney knows definitely is that the ship was a steamer and had been taken out of the bulk and landed in Europe.

His first job at the secret rendezvous will be to try to open two caskets which have been sealed on one and in the process valuable papers were so badly damaged the salvagers gave up that method.

For the job that has dazed the experts of Europe, Courtney carried a very modest set of tools.

There is an option in his agreement that provides he may descend to the sunken bulk and attempt to open it. But he was undecided whether to undertake that part of the job.

Education In Fire Prevention Urged Campaign Suggested By Association Of Canadian Fire Marshals

Approval of a resolution calling upon insurance companies, health organizations, boards of trade and other public bodies, to undertake an educational campaign designed to bring to public attention the principal causes of fire in dwellings, the destruction of life and property resulting therefrom and the best approved methods of eliminating these fires, was given by members of the Association of Canadian Fire Marshals at their convention in Ottawa.

The occurrence of almost 35,000 dwelling fires in 1931 indicated, if not of widespread negligence, if not of criminal design, and the seriousness of the situation should be brought to the attention of the public, the resolution stated.

King Official At Ceremony A flock of thirty thousand pigeons, released from every town in Italy, marked the thirtieth anniversary of the death of King Victor Emmanuel during a ceremony held at the Vatican.

Cellophane Is Same As Artificial Silk

Just Cast In Sheet Instead Of Fine Threads

Although you may not know it, cellophane is lingerie in another form. The glossy, transparent paper in which manufacturers are now wrapping their products, from shirts to cigarettes, is simply rayon, or artificial silk, in sheet form.

We are indebted to the "C-15" Overalls, the magazine of Canadian Industries, Limited, for this rather surprising bit of information. Cellophane is our old friend the spruce tree, for we read:

"Basically, cellophane is the same as artificial silk, differing from it only in the form it takes when it reaches the casting stage, where cellophane is cast in a sheet while the silk takes the shape of fine threads."

"The use of cellophane has increased enormously in recent years. There may be some who think it merely a device to prettify things on the store counters, but that is only partly true. For cellophane is a moisture and dust-proof wrapper that has stood severe tests."

But the prettifying process has had remarkable results on sales. A list recently carried out demonstrated that the increase in sales of certain cellophane-wrapped articles has been as high as 300 per cent. on 50 per cent. gain quite frequent. On tobacco, for instance, some brands of slow-selling cigars, had then dropped to cellophane jackets and speeded their sale 100 per cent.

This is a cellophane age. More and more uses are being found for it. At the present moment, some of the handiwork of women's hats are made of braided, colored cellophane. We haven't a doubt but that some day it will be used for other strange purposes, even windows, which will require the old proverb to read: "Those who live in cellophane houses should never throw stones." So great is the belief of Canadian Industries, Limited, in cellophane that it has just erected a million and a quarter dollar plant at Shawinigan Falls—Ottawa, Ontario.

May Be Life On Venus Scientists Believe Carbon Monoxide Present In Large Amounts

Possible evidence of life on the planet Venus—discovery that carbon monoxide is "probably present in large amounts" in the planet's atmosphere—has been announced by the Carnegie Institution of Washington.

Discovery of the gas on Venus is no more indication that life exists there, the announcement said, but does show that one of the conditions essential to life seems to be present.

The discovery is more evidence of the close resemblance between the earth and Venus, which sometimes is called the "earth's twin sister," although it is a little smaller.

An inventor hopes to raise the "Lunatic," but first he will have to raise the money with which to do it, which will be even more difficult.

Princes Mentioned In His Majesty's Birthday Honors List

His Majesty King George on the occasion of his 67th birthday, left and right: The Duke of York, promoted rear-admiral and also major-general and viceregal in the Royal Navy, Army and Air Forces respectively; while the Prince of Wales is appointed commander-in-chief of the auxiliary air force of Great Britain. Below, left to right: Hon. H. H. Gladstone, who has been elevated to the Peerage; Charles Kingsford-Smith, famous aviator, has been knighted; David Davies, prominent Welsh industrialist, is made a Peer; Lord Buckmaster, elevated to a Viscountcy; and the Hon. Mr. Justice Atkinson, who becomes a Privy Councillor.

King Official At Ceremony A flock of thirty thousand pigeons, released from every town in Italy, marked the thirtieth anniversary of the death of King Victor Emmanuel during a ceremony held at the Vatican.

The unknown soldier, observing the seventeenth anniversary of Italy's entrance into the World War.

Gardening Notes

So Many Flowers To Choose From To Suit The Individual Needs

Even if our flower garden is small or shaded or contains poor soil, we should not be discouraged. After all, there is something that will fit it, and do well and it is this adapting of our garden to meet our own individual conditions that adds much pleasure to the hobby. In permanently shaded quarters, that is where there is shade from some building or tree, the year round, tuberous rooted Begonias, pansies and wild flowers will be found to suit. In any other, in partial shade, Clarkia, Annual Larkspur, Lupinus, Nicotiana, Phlox and Veronica should be grown. On poor soil, Portulaca is a favorite, as well as Alyssum, Sweet-scented Stock, Linum, Calceola, Calliandra, Solanum, Scabiosa, tulips, Salpiglossis, Margallia, Petalonia and many others. These will also successfully resist dry weather than most others.

For cutting purposes, we have a very long list to choose from, but should include Cypripedium, which can be sown in the making up bouquets, Salpiglossis, Sweet Pea, Zinnia, Cosmos, Aster, and many others.

For the garden, we should include Stock, Nicotiana, Mignonette, Alyssum, Sweet Pea, Zinnia, Cosmos, Aster, and many others.

For the garden, we should include Stock, Nicotiana, Mignonette, Alyssum, Sweet Pea, Zinnia, Cosmos, Aster, and many others.

LOST 20 LBS. FAT Without Altering Diet

To reduce weight without any attention to diet is rather more than anyone should expect. That the Krukenberg should have succeeded in this is a great credit to its effectiveness.

"When I started taking Krukenberg for reducing weight, I weighed 170 lbs. That was seven months ago. I decided I was too heavy, and now, thanks to the half teaspoon of Krukenberg every morning, I weigh 150 lbs. I have been that way for nearly four months. I may say I feel much better. I did not diet myself in any way whatever.

Krukenberg does not reduce your weight—like so many products claim to do. But taken regularly over a period of time, with a good diet and gentle exercise, half a teaspoon before breakfast, will take away the fat and restore your figure to its normal weight. Yet at the same time—build up health with a great boost of vigor and energy for you."

WORLD HAPPENINGS BRIEFLY TOLD

British Columbia will submit briefs on import and export opportunities at the Ottawa Imperial Conference.

Japan's Bureau of Public Works is spending nearly \$8,000,000 in road construction and improvement during the 1931-32 fiscal year.

Sir Hubert Wilkins arrived at Oslo, Norway, recently and talked over another polar trip with Harold U. Sverdrup, Norwegian polar expert.

The Exchange Telegraph reports that a United States gunboat had fired on Chinese soldiers who were attacking two British estates.

The Cochran bill to make interstate kidnapping a federal crime punishable by death was approved by the United States House of Representatives Judiciary committee.

The college of Page, State, state college of Washington, conferred an honorary degree of Doctor of Laws on Premier S. P. Tointon, of British Columbia.

France officially recognized the fleet of Amelia Earhart Putnam at a reception, where she was awarded a gold medal commemorating her flight from Harbor Grace to Ireland.

Five flying boats from Detroit, Michigan, are now somewhere in northern British Columbia gold fields where their crews will take part in a prospecting survey.

Mrs. C. H. Crowe, Guthrie, Ont., was re-elected president of the Dominion Board, Women's Missionary Society of the United Church of Canada. She was appointed to supervise work of the society in home and mission fields.

Empire Shipping Week

Proposal is Made To Split 'Aide Week' For This Purpose This Fall

An "Empire Shipping Week" for Canada will be arranged during the autumn, probably with its opening conference in Ottawa, if the hopes of the Canadian Manufacturers' Association, which has been so intimately in the report of the commercial intelligence committee presented at the 61st annual general meeting of the association at Ottawa. Empire shipping weeks were held in 1928 and 1929 and its revival has been urged upon the minister of trade and commerce.

Yukon Land Of Flowers

Yukon Territory, Canada, is a land of flowers. Hundreds of types of flowers, plants and shrubs grow on every hill and valley. Nature responds generously where flowers are cultivated and one of the lasting impressions left with the visitor is the variety and beauty of the flowers which decorate the houses and beautify the grounds of Dawson, the capital.

First Lady: "Been in the capital, eh? Was your surgical or medical?"

Second Lady: "Witcher mean?"

First Lady: "Well, was yer. I'll when yer went in and they made yer well, or was yer well when yer went in and they made yer ill?"

PERSONAL

SCOTCH LADY AT PRESENT

In Canada, would like to take in charge one or more young ladies. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady in any part of Canada or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give references in connection to interested party. Apply Box 50, Winnipeg Magazine Union, 115 McDermott Ave., East, Winnipeg, Man.

Brighter Prospects

Saskatchewan Farmers Will Profit By Past Experiences

With his crop grows the hope of the Saskatchewan farmer. Saskatchewan today is a far brighter province than some months ago, with present indications pointing to a successful wheat production this season. Soil trials throughout the province are encouraging in the hope that harvest time will find sufficient money to carry on independent of government relief.

Government officials say one good crop will make this possible. One good crop will disperse the cloud of poverty which so long has enveloped the farm lands of Saskatchewan. One good crop will relieve Saskatchewan people of the tremendous burden they have been forced to share in the effort to support 275,000 people affected by drought which in many districts has ruined three successive crops.

Through it all the farmer is hopeful. Happy in the thought of what a crop will bring to him. Even when forced to appeal for food, clothing, fuel and fodder, the farmer would not admit defeat.

E. B. Daniels, commissioner of relief, is high in his praise of the spirit of the farmer. Men, owing vast amounts of money, and at present without a cent of cash, have come to the relief commission. Mr. Daniels said, "I am delighted to see the farmers in such a position. They pay back everything they owe." Mr. Daniels said, "They are not disgraced, and have faith in such successful crops."

From impressions gathered while interviewing men applying for relief, Mr. Daniels believes the farmer never again will be caught under similar circumstances. Men have toiled but lost a great deal in stock speculation and speculative farming. Now, Mr. Daniels is convinced, the farmer will not be looking toward big returns and will be content to make a comfortable living for his family.

Even with grain prices down at today's low level the farmers expect to make sufficient money this year to re-establish their farms. The commissioner thinks stricter economies will be practiced by the farmer and farms will be more self contained.

There was so little feed in the province during the winter that 15,000 railway carloads had to be brought in from neighboring provinces, he said, but in future, fodder enough to supply the farmer's individual needs probably will be produced by the farmer himself.

Another measure of economy is the return to horse-power on the farms due to the high cost of gasoline and oil here. Possible shortage of horses with a subsequent revival in western Canada of horse-breeding is predicted by government agricultural men.

Through all their difficulties the farmers have never lost their morale. Even to the far north where some 2,000 farmers are re-establishing themselves in the Meadow Lake district after drought and sweeping winds had forced them to desert their farms in the south, there is no talk of quitting.

The Saskatchewan farmer has taken on his "hard-time" medicine like a man—and is looking for it to do him good.

Recipes For This Week

CHERRY JELLY
(Any kind except wild or choke cherry)

8½ cups (2½ lbs.) juice.
1 bottle fruit pectin.

To prepare jelly, stem and crush 3 pounds jelly rich cherries. Do not pit. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. (For stronger cherry flavor, add ½ teaspoon almond extract.) Place fruit in jelly cloth or bag and squeeze out juice.

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard 10 minutes. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about 10 6-ounce glasses.

CAKE PUDDING

1 package chocolate junket.
Left-over cake.
1 pint milk.
Cut left-over cake in small cubes and put a heaping tablespoon in each of 12 small glasses. Prepare chocolate junket according to directions on the package. Pour at once over the cake. Let stand in warm room until firm—about 10 minutes. Then chill. This may be topped with whipped cream if desired.

The number of new automobiles on French highways is increasing this year.

"Did you go to public school, Mr. Brown?"

"Yes, why?"

"I thought you must have done. Daddy says there's nothing like a public school for knocking the corners off." —The Hummel, London, England.

Contract Bridge

By Hamlin B. Hatch, Olympic Champion, Canadian Club, Toronto

In my last article the salient features of the Approach-Forcing System were given. Today I will review the Official System. This system was devised by the united efforts of several bridge experts to remedy what they considered were defects in the Approach-Forcing System. Added to this was the idea that the conventional part of the game could be made easier for the average player.

The Official System differs from the Approach-Forcing System only slightly. The chief differences are noted below.

1st. The Opening Bid of One.

In the Official System the opening bid of one is made on a hand containing from two to three and one-half quick tricks, and guarantees that in the declared suit the bidding hand will take from four to five tricks. This is practically the same as the minimum opening bid of one in the Approach-Forcing System.

2nd. The Opening Bid of Two.

The opening bid of two is made on a hand containing from two and one-half to six honor tricks and guarantees that in the declared suit the bidding hand will take at least six tricks. The bid is called the intermediate two bid and this declaration commensurate to the chief difference between the Approach-Forcing and Official Systems. This bid does not demand a response if partner's hand is a balanced hand or a trick or ruff distributional values.

It is true that on certain types of hands this bid gives good results but it is true that on many types of hands it gives too much information to the opposing side and therefore tends to nullify the chances of making good doubles. It is generally believed by experts that its disadvantages outweigh its advantages.

On the other hand it gives precise information to one's partner and amongst average players this precision of information is a very valuable asset. But if it is conceded that the present day game of contract is a battle of wits, and the main battle being fought between the cards on the table, then it is logical to think that the use of any bidding method which gives too much information to the opposing side is bad strategy if not bad contract. Personally I am of the opinion that applied to certain types of hands, the bid is valuable but I do not think this certain type of hand comes often enough to warrant the inclusion of this bid in any system. For on the average it may be said that in the Official System over eighty per cent of the opening bids are bids of one.

The opening bid of three in the Official System is similar in its application to the opening bid of two in the Approach-Forcing System. It is a demand bid and guarantees game for the particular deal in which it is made.

Except then for the variations in the opening bid convention, the Official and the Approach-Forcing Systems are practically identical. The jump-shift bids are forcing in both systems and methods of overcalling and forcing are the same. The responses by partner to an opening bid of one is identical in both systems. The trump original bid is used more frequently in the Official System than in the Approach-Forcing simply because the bids made from four card suits in the Official System may have a stronger honor trick four card suit than is required by the Approach-Forcing system.

However, both systems are easy to play and it is not a hard matter for any player to familiarize himself thoroughly with the salient differences between them, so that he can play whichever system his partner desires to play.

In the next article the One Over One and the Vanderbilt Club will be discussed.

Just the Merrest Hint of Femininity Marks These Deliciously Young

It's a darling. The bodice is given a unique effect. A wide shawl caught in at either side and tied at the back draws it snugly to the figure. The skirt is a simple, straight, and comfortable. However, if you wish to omit the sleeves then the pretty neckline will still turn the shoulder and form quite a delightful finish.

And as for the trousers, they are shaped so as to affect a skirt, and are in fashion.

Pale blue crepe satin is desired for lounging.

Style No. 911 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. It requires 3½ yards of 36-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Care Hephcote Camels
The conquering of the desert by automobile has had a disastrous effect on the camel market. In the annual camel sale at Marrakech, 600,000 camels were sold at from 500 to 1,000 francs. Automobiles now carry the freight loads that were once trucked across the desert by camels.

Measure "Creep" Of Metal
The "creep" of metal, the change in size and shape which takes place in this supposedly rigid material, is being measured by University of Michigan engineers, using instruments whose readings are accurate to a millionth of an inch.

Antismog's Fine Modern Telescopes
Antismog's fine modern telescopes show that about six stars in every hundred are double.

May Be Great Help

Appointment Of "Advisers" To Economic Conference Is Good Move

The movement for the appointment of "advisers" capable of watching the welfare of the industries likely to be affected by the Ottawa Conference is to be welcomed. The wider and deeper the interest taken in matters relating to the whole Empire, the better it will be for the Imperial system. Chambers of Commerce, manufacturing organizations, farmers, shipbuilders and trade unions have already taken a consciousness that the Ottawa Conference is likely to affect them vitally, and will possibly determine the future of the British Empire in many important respects. Decisions will necessarily rest with the ministers at Ottawa and the governments they represent, because only governments can determine policy and be responsible for it. But there is every advantage in ministers being aided by eyes and ears which will be able to submit reports of points of view—Melbourne Australia.

Qualified As Perfect Host
Man In New York State Ready When That Came

Imagine yourself in your library reading a book. It is a Sunday afternoon, raining, a day for indoors. A fire crackles in the fireplace.

Violently, almost as if the heavens themselves were falling, the cup is broken. A big monoplane has fallen out of the clouds, barely missed the house and buried its nose in the yard.

What would you do? A Falconer (N.Y.) man, we see by the paper, experienced exactly that kind of an emergency. He calmly walked out the porch, heard the airman's story of an empty gas tank, and offered the sudden pilot his car so that he could ride to the nearest gas station and get more fuel.

Doubtless it will be some time before one must expect almost any Sunday afternoon in the country, to have an airman drop in like that and with his gas tank empty. Still, for war is so far off, it is to be hoped that it will be some time before one must expect almost any Sunday afternoon in the country, to have an airman drop in like that and with his gas tank empty. Still, for war is so far off, it is to be hoped that it will be some time before one must expect almost any Sunday afternoon in the country, to have an airman drop in like that and with his gas tank empty.

Britain and Europe
Entangling Alliances Have Caused Nothing But Trouble In The Past

Great Britain's troubles lie in and proceed from Europe, which has drained her through the centuries of how many millions of lives and what incalculable wealth. The British people seem to be free of this focus. They mean to regain their liberty of action and to conduct themselves with friendship toward all nations, and to engage in entangling alliances and agreements with none.

Let us turn to take their own measure of their liabilities and to provide against them as they think fit. The first step to the recovery of our political freedom must be to make an end of this farce of conference after conference at Geneva and the League of Nations, to disengage our statesmen from the Empire, and are proving the dearest investment we ever made—London Express.

To Make Navigation Safe
Danger Spots On Bay Route To Be Marked

In preparation for the 1932 season of navigation through Hudson Straits to the port of Churchill, the Canadian Government steamer "N. B. McLean" will spend the summer in those waters.

New light will be installed by the "N. B. McLean" crew at Baffin Island, Resolution Island, Whales Island (east end), Nottingham Island, and Cook Island. A light will also be installed at Hubbard's Point by the staff of Churchill.

Where It Belonged
The visiting director of education was complaining that the school was not properly cleaned. Rubbing his finger on a big globe, representing the world, he said: "Look at this. It's covered with dust."

"But after all," protested the school-keeper, "that part you're touching is the Sahara Desert."

Drought In Zululand
Twelve thousand cattle have died in the drought which has swept two districts of Zululand. Native reports are to be showing signs of desperation, and are committing wholesale theft of sheep. The drought has also so severe that practically every sign of plant life has disappeared.

Here and There

Charles L. Douglas, B.N.R. recently named commander of the Pacific coast zone, the Empire of Japan, largest of Canadian Pacific liners on the Pacific coast, will be 25,000-ton charge alongside Pier D, Vancouver within 44 minutes of the Pacific record.

His Excellency Rana Pratap Chandra Bahadur, Rajah of Jubbal, was travelling on the Empress of Japan from the Far East, recently. He might have been taken for any business man but for the presence of the white diamond, the Maharajah of Kathiawar, India, who was attired in Indian garb.

Crop conditions in western Canada are most encouraging and, given normal weather conditions, the quantity and quality of the harvest will go a long way towards restoring confidence and prosperity. Grant Hall, vice-president of the Canadian Pacific Railway, stated recently on his return from a tour of inspection of the company's property.

Final figures of butter production in Alberta for 1931 amount to 22,387,322 pounds, which is more than 600,000 pounds above the previous highest year record for the province. Closely associated with butter production is a movement inaugurated by the Federal and Provincial Departments of Agriculture to encourage farmers to enlarge their forage crop areas.

Major "Bill" McCrehan, one of the province's best known columnists, and Lionel Hitchman, veteran defense man of Boston Braves, landed a 19 and a 30 pounder salmon from New Brunswick waters respectively in May. The Major got his fish with a four-ounce trout and on the Calumet River; Hitchman was fishing at the Pointe St. Pierre on the Saint John River.

John Cuddey, of Milwaukee, hunting around the Great Divide near Banff, and lured by a butterfly, charging wounded greatly almost within striking distance and with but one cartridge left in his rifle, coolly stood his ground and dropped the monster at his feet. Mr. Cuddey was hunting in India, Africa and Alaska, but said he had never had the tiger he experienced on the recent trip.

Success of the bargain trips over western Canada and holidays which the Western Pacific has put into effect this year was further attested by the great popularity enjoyed during the recent Victoria Day holiday and in week-ends following. To take one large centre—Montreal the city was literally flooded by the great influx of visitors from eastern Canada and the United States and other big Canadian cities report similar conditions.

Branch officers of the Canadian Pacific Railway, representatives of railway operation systems in Canada and the United States, members of the Masonic Order and of Rotary and surrounding groups from virtually all walks of life united in an impressive tribute to the late George A. Walton, general passenger agent of the railway, at his funeral in Montreal last night. The funeral was held in the Victoria Hall, Montreal, and was a most impressive affair.

Draying & Teaming

I am prepared to do all kinds of Draying and Teaming also deliver earth and manure for gardens and lawns.

GOODINE & BENJAMIN

Meat Market

When in the city to do some shopping, and when it comes to Meat just call at our store and get the Best there is. We always have a choice line of

THE HICKS TRADING CO.

Synopsis of By-law No. 167 to be Voted on by Burgesses on July 29th, 1932

A by-law has been introduced Franchise the owner of a gas well may use gas from such well Redcliff for the purpose of or for his own manufacturing authorizing the Mayor and purposes
 Secretary Treasurer to execute (c) The Company is not obliged to supply gas for manufacturing purposes.

NOTICE

I, Frank Baird, of the Town of Redcliff, in the Province of Alberta, Returning Officer, hereby certify:

That the foregoing is a true synopsis of a proposed by-law which has been introduced by the Town of Redcliff and which will be finally passed within four weeks after the assent of the burgesses thereto.

The vote of the said burgesses shall be taken on this by-law on Friday, 29th July, 1932, commencing at ten o'clock in the forenoon and continuing until seven o'clock in the afternoon, at the Town Hall in the Town of Redcliff.

Dated at Redcliff in the Province of Alberta, this 7th day of July, A. D. 1932.

FRANK BAIRD,

Returning Officer.
